*Review*

Evaluating the characteristics of multiwall carbon  
nanotubes 2581

*Original Articles*

Impact of ink formulation on carbon nanotube  
network organization within inkjet printed  
conductive films 2603

Thermomechanical properties of chemically  
modified graphene/poly(methyl methacrylate)  
composites made by *in situ* polymerization 2615

Formation of a carbon fiber/polyhedral oligomeric  
silsesquioxane/carbon nanotube hybrid reinforce-  
ment and its effect on the interfacial properties of  
carbon fiber/epoxy composites 2624

<sup>13</sup>C NMR and dielectric spectroscopy of strain  
relaxation in depolymerization of rhombohedral C<sub>60</sub> 2633

Comparison of double-walled with single-walled  
carbon nanotube electrodes by electrochemistry 2639

A radiofrequency induced intra-band transition in  
carbon nanotubes 2648

In-plane lattice thermal conductivities of multilayer  
graphene films 2653

Single-walled carbon nanotubes as a dopant in  
p-type cuprous oxide films 2659

Analysis of the strong propensity for the deloca-  
lized diamagnetic  $\pi$  electronic structure of hydro-  
genated graphenes 2665

The effect of boron incorporation on the structure  
and properties of glassy carbon 2671

Nano-patterning of through-film conductivity in  
anisotropic amorphous carbon induced using  
conductive atomic force microscopy 2679

Multi-functional multi-walled carbon nanotube-jute  
fibres and composites 2683

TiO<sub>2</sub> nanoparticles assembled on graphene oxide nanosheets with high photocatalytic activity for removal of pollutants 2693

Electrochemical oxidation of multi-wall carbon nanotubes 2702

A theoretical analysis of field emission from graphene nanoribbons 2709

A grand canonical Monte Carlo study of hydrogen adsorption in carbon nanohorns and nanocones at 77 K 2715

Large area synthesis of conical carbon nanotube arrays on graphite and tungsten foil substrates 2725

The growth and morphology of core/shell hetero-structured conical carbon fibers 2735

Thin film graphite electrodes with low stress generation during Li-intercalation 2742

Effects of electrophoretically deposited carbon nanofibers on the interface of single carbon fibers embedded in epoxy matrix 2750

Growth of bent carbon nanotubes by in-situ control of cantilever bending 2760

Fabrication of nanoscale three-dimensional graphite stacked-junctions by focused-ion-beam and observation of anomalous transport characteristics 2766

The use of tannin to prepare carbon gels. Part I: Carbon aerogels 2773

The use of tannin to prepare carbon gels. Part II. Carbon cryogels 2785

On-substrate growth of single-walled carbon nanotube networks by an "all-laser" processing route 2795

High-quality few layer graphene produced by electrochemical intercalation and microwave-assisted expansion of graphite 2809

Influence of carbon nanotubes on the thermal, electrical and mechanical properties of poly(ether ether ketone)/glass fiber laminates 2817

Tuning the compressive mechanical properties of carbon nanotube foam 2834

A comparative study of the electrogeneration of hydrogen peroxide using Vulcan and Printex carbon supports 2842

Synthesis of graphene paper from pyrolyzed asphalt 2852

High-power splitting of expanded graphite to produce few-layer graphene sheets 2862

**Publishing Office:** Elsevier Ltd, The Boulevard, Langford Lane, Kidlington, Oxford OX5 1GB, England

**Advertising information:** If you are interested in advertising or other commercial opportunities please e-mail [Commercialsales@elsevier.com](mailto:Commercialsales@elsevier.com) and your enquiry will be passed to the correct person who will respond to you within 48 hours.

**Publication information:** *Carbon* (ISSN 0008-6223). For 2011, volume 49 is scheduled for publication. Subscription prices are available upon request from the Publisher or from the Elsevier Customer Service Department nearest you or from this journal's website (<http://www.elsevier.com/locate/carbon>). Further information is available on this journal and other Elsevier products through Elsevier's website (<http://www.elsevier.com>). Subscriptions are accepted on a prepaid basis only and are entered on a calendar year basis. Issues are sent by standard mail (surface within Europe, air delivery outside Europe). Priority rates are available upon request. Claims for missing issues should be made within six months of the date of dispatch.

**Orders, claims, and journal enquiries:** please contact the Elsevier Customer Service Department nearest you:
